## 1. Executive Summary / 1. 执行摘要

China Digital Coin (CDC) is designed as a blockchain-based digital asset for payment innovation, exchange access, community development, and ecosystem utility. The project starts on BNB Chain and aims to support practical digital use cases through wallet, merchant, trading, AI, and community tools.

China Digital Coin (CDC, 华夏数字币) 旨在打造一个基于区块链的数字资产，用于支付创新、交易接入、社区发展以及生态应用。项目以 BNB Chain 为起点，未来计划通过钱包、商户、交易、人工智能和社区工具支持实际数字化应用场景。

This whitepaper v1.0 presents the early-stage blueprint of CDC. It focuses on a simple, transparent, and practical framework rather than complex promises. Future versions may be updated as the ecosystem, integrations, liquidity, and product modules develop.

本白皮书 v1.0 展示 CDC 的早期蓝图，重点是简洁、透明和实用的框架，而非复杂承诺。随着生态系统、集成、流动性和产品模块的发展，未来版本可能会持续更新。

## 2. Vision and Mission / 2. 愿景与使命

The vision of CDC is to become a digital utility asset that connects payment, exchange, and ecosystem services in a user-friendly blockchain environment.

CDC 的愿景是成为一种数字实用型资产，在易于使用的区块链环境中连接支付、交易和生态服务。

- Build a blockchain asset with clear public contract information.
  - 建立具有清晰公开合约信息的区块链资产。
- Support future payment and merchant utility inside the CDC ecosystem.
  - 支持 CDC 生态系统内未来的支付和商户应用。
- Prepare exchange access, wallet integration, and community participation.
  - 推动交易接入、钱包集成和社区参与。
- Explore AI-enabled digital services for risk, automation, and user support.

- 探索面向风险控制、自动化和用户支持的人工智能数字服务。

### 3. Market Problem / 3. 市场问题

Many digital communities still face fragmented payment tools, limited token utility, high onboarding barriers, and difficulty distinguishing official assets from copied or fake tokens.

许多数字社区仍面临支付工具分散、代币用途有限、使用门槛较高，以及难以区分官方资产与复制或假冒代币的问题。

For early-stage blockchain projects, trust depends on simple public information: an official website, verified contract address, clear token details, transparent communication, and consistent branding.

对于早期区块链项目而言，信任来自简单而公开的信息：官方网站、已公开的合约地址、清晰的代币信息、透明沟通以及一致的品牌形象。

### 4. CDC Solution / 4. CDC 解决方案

CDC provides a foundation for a digital ecosystem where the token can be used as a utility asset across payment, exchange, community, and future platform modules.

CDC 为数字生态系统提供基础，使代币能够作为实用资产应用于支付、交易、社区以及未来平台模块。

- Official website and public contract reference for user verification.
  - 通过官方网站和公开合约地址帮助用户核验。
- Initial deployment on BNB Chain for accessible blockchain interaction.
  - 初期部署于 BNB Chain，便于用户进行区块链交互。
- Roadmap for wallet, merchant, trading, AI, and ecosystem tools.
  - 规划钱包、商户、交易、人工智能和生态工具。
- Clear legal notice to avoid confusion with official state-issued currency.
  - 提供清晰法律声明，避免与官方国家发行货币混淆。

### 5. Token Information / 5. 代币信息

<b>Token Name / 代币名称</b>	China Digital Coin / 华夏数字币
<b>Symbol / 符号</b>	CDC
<b>Main Network / 主网络</b>	BNB Chain
<b>Contract / 合约地址</b>	0x7C99596E724507B034Dc2AC33E8D55396ac54B71
<b>Decimals / 精度</b>	6
<b>Initial Supply / 初始供应量</b>	1,000,000,000 CDC
<b>Initial Target Reference / 初始参考目标</b>	1 CDC = 1 RMB
<b>Official Website / 官方网站</b>	<a href="https://chinadigitalcoin.com">https://chinadigitalcoin.com</a>

Users should always verify CDC by its official contract address. Token name and symbol alone are not sufficient because anyone can create a token with a similar name or symbol.

用户应始终通过官方合约地址核验 CDC。仅凭代币名称和符号并不足够，因为任何人都可能创建相似名称或符号的代币。

## 6. Token Utility / 6. 代币用途

- Payment Utility: future use in digital payment and merchant tools.
  - 支付用途：未来可用于数字支付和商户工具。
- Exchange Access: planned DEX liquidity and trading ecosystem integration.
  - 交易接入：计划接入去中心化交易流动性和交易生态。
- Community Utility: community participation, campaigns, and ecosystem rewards.
  - 社区用途：社区参与、活动和生态激励。
- Digital Services: possible integration with wallet, AI, game, and platform services.
  - 数字服务：可能与钱包、人工智能、游戏和平台服务集成。

CDC utility will be developed progressively. Any future utility depends on product readiness, user adoption, liquidity, technical integration, and applicable regulations.

CDC 的用途将逐步发展。任何未来用途均取决于产品准备程度、用户采用、流动性、技术集成以及适用法规。

## 7. Tokenomics / 7. 代币经济模型

Public Sale / 公开销售	40%
Liquidity / 流动性	10%
Ecosystem / 生态建设	20%
Development / 开发	10%
Marketing / 市场推广	15%
Reserve / 储备	5%

The tokenomics above is an initial allocation model for planning and public communication. It may be refined in future versions as the project matures and operational needs become clearer.

上述代币经济模型是用于规划和公开沟通的初始分配方案。随着项目成熟和运营需求更加明确，未来版本可能会进一步优化。

## 8. Roadmap / 8. 路线图

Phase 1 / 第一阶段	Website, logo, smart contract, whitepaper, and public contract display / 网站、Logo、智能合约、白皮书和公开合约展示
Phase 2 / 第二阶段	DEX liquidity, token metadata, wallet visibility, and community channels / DEX 流动性、代币元数据、钱包显示和社区渠道
Phase 3 / 第三阶段	Merchant tools, internal wallet, trading access, and payment integration / 商户工具、内部钱包、交易接入和支付集成
Phase 4 / 第四阶段	AI services, game utility, ecosystem expansion, and business partnerships / 人工智能服务、游戏用途、生态扩展和商业合作

The roadmap is directional and may change based on technical feasibility, market conditions, business partnerships, compliance needs, and available resources.

路线图为方向性规划，可能会因技术可行性、市场环境、商业合作、合规需求和可用资源而调整。

## 9. Security and Transparency / 9. 安全与透明度

- Official contract address is displayed on the website and in this whitepaper.
  - 官方网站和本白皮书均展示官方合约地址。
- Users should verify transactions and token identity through the blockchain explorer.
  - 用户应通过区块链浏览器核验交易和代币身份。
- The project will prioritize clear communication around liquidity, metadata, and integrations.
  - 项目将优先围绕流动性、元数据和集成进行清晰沟通。
- Users should avoid unofficial links, copied token names, and unknown contract addresses.
  - 用户应避免使用非官方链接、复制代币名称和未知合约地址。

## 10. Legal Notice / 10. 法律声明

CDC is an independent blockchain-based digital asset project. CDC is not legal tender, not a bank deposit, not a security representation, not an official government currency, and not a central bank digital currency.

CDC 是一个独立的区块链数字资产项目。CDC 不是法定货币，不是银行存款，不代表证券权益，不是官方政府货币，也不是中央银行数字货币。

CDC is not issued, endorsed, guaranteed, or affiliated with any government, central bank, financial regulator, or state-issued digital currency program.

CDC 并非由任何政府、中央银行、金融监管机构或国家发行的数字货币项目发行、认可、担保或关联。

Digital assets involve market, liquidity, technology, regulatory, and operational risks. Users should conduct independent research and make their own decisions before purchasing or using CDC.

数字资产涉及市场、流动性、技术、监管和运营风险。用户在购买或使用 CDC 前，应进行独立研究并自行做出决定。
